

Global Protect Remote Access

- **Click the start Menu** and navigate to Palo Alto Networks>Global Protect
- **Open Global Protect** and hit the connect button
- If you have not logged into SCC's Single Sign-on you will be redirected to the login page. Please log in using your SCC Hub credentials and password.
- **You may see a screen asking you to open Global Protect.** Click Open Global Protect. (You may check the *always allow* box to the left of the prompt to save time in future logins. This is not required)
- When Global Protect displays "Connected" internal SCC resources are available.
- When done, find Global Protect in the system tray. It is a blue Earth icon in the system tray.
- Click disconnect.
